

DESCRIPTION OF FOUNDER

Dr. J. Theodore Brown Jr is the founder and CEO of Telecare LLC a hybrid based health technology platform that facilitates access to health care and promotes the home as an <u>option</u> to receive certain health care services. He is originally from New York City and strongly believes that technology can enhance and make health care more accessible and affordable on a global basis.

Before Telecare LLC, Dr. Brown worked in developing and organizing technology solutions and programs for some of the most challenging mental health and substance abuse problems, as well as creating and integrating health protocols and models of home health care for the elderly and chronically ill.

Dr. Brown has a broad range of clinical experience that includes clinical program development, management, forensic consultation, research and education. He served in the US Navy Medical Service Corp. and is a Plank Member of NRMC, Okinawa, Japan. He has served as expert witness for the U.S. Congress and represented the U.S. Clinically and Diplomatically abroad for the U.S. Department of State.

He created and received approval for the first and only FDA approved Home Drug Testing System sold over the counter. He holds a Ph.D. in Experimental Clinical Psychology from S.U.N.Y Stony Brook and currently lives in New Jersey with his wife of twenty years.

www.telecarellc.com A DIGITAL HEALTHCARE COMPANY TECHNOLOGY

Telecare LLC's Technology Division (Virtual Health Systems) offers health Providers and their Patients/Clients the option of providing and receiving health care "virtually" via its technology. The technology is a cloud (Internet) based platform that allows Providers and Patient/Clients to use any device that can access the Internet to Provide and receive health care services at work, on travel, or in the privacy of their home.

Telecare LLC 1501 Oakland Avenue, Suite D Millville, New Jersey 08332-0009

TCB005-I

Telecare LLC was originally conceived with the purpose of creating a new standard of care to serve the healthcare needs of disabled Veterans. As an afterthought, we realized that if the "standard of care" we established was extended to other special needs groups, it would help improve the quality of health care for society at large

TELECARE PRIMARY OBJECTIVES

Telecare's primary objective is to create an integrated, virtual, technology enhanced model of health care that facilitates communication between health care Providers and their Recipients.

Telecare LLC believes that **home care** is the future of health care. We believe this is especially true for:

- Disabled Veterans
- Persons Affected by Mental Illness
- Persons Affected by Substance Abuse
- The Elderly, Disabled
- Persons with Chronic Illness
- Children with Special Needs
- Persons restricted from receiving proper health care due to weather, limited transportation and those living in remote/rural areas.

TELECARE LLC TECHNOLOGY SERVICES

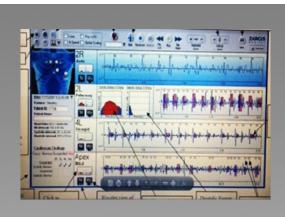

Telecare LLC uses technology and innovative products to provide a unique array of home programs such as:

- Electronic Health Record Intake
- Audio Visual Conferencing
- Audio Visual Recording
- Text Chat Messaging
- V-Mail
- Appointment Scheduling
- Enhanced Specialty Referral Consultation
- Virtual Program Development
- Enhanced Encryption & Security
